Skills

Programming Languages:

Typescript/ Javascript Java Python

Front-end frameworks:

Angular React HTML/ CSS

Back-end frameworks:

NodeJS Spring Boot

Core CS: OOP, System Design, OS

Tools:

WSO2, Jenkins, Git, Rest API Docker
Linux

DB: MongoDB, MariaDB, MySQL

Siddharth Upadhyay

Software Engineer

WORK EXPERIENCE

Alepo Technologies: Software Engineer

June 2023–Present

- Optimized in-app notifications for mobile point of sales apps to reduce server load leveraging core angular concepts.
- Integrated payment gateways in the customer care app with fallback cases.
- Optimized docker containerization scripts.
- Cached SQL query response to improve performance
- Worked with Java servlets, portlets and Java ORM.
- Developed considering ATDD practices.
- Documented key process and development SOPs on release pages for ease of other developers.

AI Kalpa: Deep learning Intern

Jan 2022–Feb 2022

Worked on segmentation of MRI scans that were used for further scrutiny.

Projects

FULL STACK INVENTORY MANAGEMENT SYSTEM | Built using the MERN stack. Modules like employee monitoring, order tracking and admin profile management. Frameworks & libraries used: Reactjs, NodeJs, MySQL, Redis, Express.

INDIA vs AUSTRALIA CRICKET DASHBOARD | For the love of cricket. React app highlights India vs Australia test series over last 20 years. Search & navigate, responsive visualization are the highlights. Frameworks & libraries used: ReactJs, Nivo, MUI.

IMAGE CLASSIFICATION USING DEEP LEARNING | IMAGE CLASSIFICATION USING DEEP LEARNING

Fullstack Ecommerce Platform | Built in Angular and Spring Boot

Ongoing Courses

Java Spring Boot Framework and JPA – Udemy
